

SniZtop Gum

STRAGEN IS PROUD TO LAUNCH THE FIRST CHEWING GUM FOR FAST ALLERGY RELIEF

STRAGEN now offers an innovative and effective form in the treatment of allergy symptoms:

- Based on ovomucoids, glycoproteins derived from quail egg, SniZtop Gum has a clinically proven efficacy on both allergic rhinitis and atopic dermatitis.
- SniZtop Gum reduces all bothersome allergy symptoms, such as rhinorrhoea and itchy eyes.
- The gum allows an optimal sublingual absorption and a continuous release of bioactives. Patients will feel relieved as early as 5 minutes of chewing.

SniZtop Gum offers a user-friendly solution to active people, in a highly convenient form. Besides, SniZtop Gum is sugar free, with a natural mint-lemon flavour.
